

Company Granville Oil & Chemicals Ltd.

Brand Hypalube Evo

Product Fully Synthetic 5W/30

Case No VLS010151

02/11/2017 This case was submitted to VLS

19/06/2018 The complaint concerned the application of ACEA 2012 C2 and C3 sequences and also OEM specifications pertaining to VW 504.00/507.00, PSA B71 2290 and GM LL-A/B-025 for which it was claimed that no additive package was currently available. In addition it was also claimed that the product did not meet its own stated NOACK volatility measure.

VLS procured and tested a sample of the product and found that the product failed to meet its stated NOACK volatility measure which at 12.5% exceeded the stated MB 229.51 limit of 10% and also raised questions about the claims relating to PSA B71 2290 and GM LL-A/B-025.

The Named Party cooperated fully with the investigation and undertook their own internal investigation, eventually deciding to discontinue the product effective 30th June 2018.
