Status Compliant during investigation

Case No VLS010249

19/06/2026 This case was accepted by VLS

07/08/2026 The case concerns the compliance of the product's HTHS which is a marginal failure against the Volvo performance claim VOLVO VCC RBSO-2AE which has a minimum HTHS requirement of 2.75mPa.s against a returned test result of 2.66mPa.s.

VLS independently sourced and tested a sample of the product. Independent testing by an ISO 17025 accredited test house showed that the sample returned a result of 2.73 mPa.s for HTHS, which is within the 95% confidence limit.

Consequently VLS found that the sample is compliant against the Volvo specification and the investigation is closed subject to a six-month review in line with its stated process.
