Case No VLS010231

17/04/2025 This case was accepted by VLS

01/07/2025 An advisory has been issued as the product was close to being out of specification for Low Temperature Cranking Viscosity at -35°C, but considered satisfactory once test precision limits are applied. STJLR.51.5122 specification requires a maximum of ≤ 4500 mPa.s at 35°C, the result observed by VLS was 4674 mPa.s.

No further action will be taken in this matter.
